CRYSTAL SKULL MANUFACTURER & WHOLESALE SUPPLIER

A carving workshop, not a trading desk

Every carving in this catalogue is made in our own workshop in Donghai County, Jiangsu, China — one of the country's largest crystal trading and processing centres. We are the manufacturer, not an intermediary.

300 m² WORKSHOP SPACE	15 CARVING MACHINES	20+ TEAM MEMBERS
20 STOCK DESIGNS	5–150 cm CUSTOM SIZE RANGE	100% INDIVIDUALLY INSPECTED

Our Own Carving Workshop

Manufacturing in Donghai, Jiangsu — a workshop of approximately 300 m² with 15 machines and a team of more than 20 people. Not a trading company.

Wholesale From 10 Pieces

Our minimum order is 10 pieces per order, and you can mix designs and materials freely within the same order. No need to reach 10 pieces per design.

Custom Work From Your Reference

Send a photo, sketch or drawing — or specify the raw stone. Custom dimensions, shapes, logos, patterns and packaging are all available.

Individual Inspection

Every finished piece is checked individually by hand before it enters inventory.

Material-Specific Information

We describe material, origin and treatment separately, and tell you when something is unverified. Ask for the specification of your specific lot.

Installation-Scale Capability

We have produced monumental carvings up to approximately 1.5 m. Large-format works are quoted and planned project by project.

WHAT WE ASK YOU TO HOLD US TO

Every finished piece is inspected individually by hand before it enters inventory. Material, origin and treatment are described as separate fields, and where we have not verified something we mark it pending rather than call it natural. We would rather answer a question than lose your trust.

Twenty stock designs

From 1.3 lb display pieces to a 9.1 lb centrepiece, in quartz, agate, jasper, obsidian, feldspar and other materials. Every design can be produced at custom dimensions from 2 to 59 in (5–150 cm).

ONE PIECE OF EACH DESIGN

Every piece shown here is a single hand-carved carving, and we hold one of it. The photograph is that piece, not a sample of a run. When it sells it is gone, and the next one is carved again from a different block of stone. Orders are therefore made to your quantity — ask for current photographs of what is on the bench.

What our products are made of

Buyers in the United States and Australia are rightly careful about stone treatments. We take the position that it is better to say "we have not verified this yet" than to publish a claim we cannot evidence.

LABEL	WHAT IT MEANS
Natural	Natural rough stone, no treatment applied. This is what most of our range is.
Heat-treated	Colour changed by heating. Our yellow quartz is heat-treated by heating and colour fading, and is always labelled as such.
Dyed	Artificial dye introduced. If a piece is dyed, we will tell you.
Irradiated	Colour changed by irradiation.
Synthetic	Lab-created crystal. We do not currently sell synthetic crystal skulls.
Glass	Glass. We do not currently sell glass skulls.
Resin	Resin. We do not currently sell resin skulls.
Pending	Not yet verified. We will confirm from supplier records before quoting.

> **TWO FACTS, RECORDED SEPARATELY**
>
> A piece can be carved from natural rough stone and still have been treated afterwards.
> **ORIGIN AND TREATMENT ARE DIFFERENT QUESTIONS**
>
> , and we give both answers. Where a material is marked pending we confirm it from supplier records before you order — we do not quietly default it to "natural".

We make no health, medical or therapeutic claim about our products. They are sold as decorative carvings, collectible objects and giftware. Symbolism, craftsmanship and cultural interest — not efficacy.

AN HONEST CAVEAT

We can reproduce a design. We cannot reproduce a piece of stone. Colour, banding and internal structure differ between blocks, so a second run will be recognisably the same design in a materially similar — but not identical — stone.

MONUMENTAL WORKS

We have produced crystal skulls at approximately **1.5 M**. Work at this scale is made to order and quoted as a project, because the material available at size determines what is possible. Shown on the cover.

How to order

Wholesale pricing is quoted per order — it depends on material, size, quantity, carving detail and packaging, and stone prices move. No prices are printed in this catalogue.

TERM	DETAIL
Minimum order	10 pieces per order. Designs and materials may be mixed freely within one order.
Stock pieces	One of each design. Every stock design is a single hand-carved piece and the photograph is that piece; an order is carved to your quantity rather than drawn from a shelf.
Quotation	Per order, expressed per piece and per kilogram. Valid 30 days unless stated otherwise.
Sampling	Custom and OEM projects only. A paid sample produced after specifications are agreed, for your approval before mass production; the fee is credited against an order for the same design and material. Stock wholesale orders start at 10 pieces and are not sampled.
Lead time	Confirmed per order once specification and quantity are agreed. We do not quote a generic figure.
Packing	Protective wrap, individual box, export carton. Custom packaging available.
Freight	Quoted DDP to your door, or FOB / EXW if you use your own forwarder. Carved stone is charged on actual or volumetric weight, whichever is greater.
Payment	Confirmed in the written quotation. Typically 30% deposit, balance before shipment.
Material	Natural stone. Colour, pattern and internal features differ between individual pieces, so a design carved again is the same design in a different stone.
Damage claims	Notify within 7 days of delivery with photographs, including the packaging.
